IMDb - findings

- Source files: 26 complete metadata part(s), title.ratings.tsv.gz.

- Clean metadata titles: 12,917,629; rated titles: 1,727,596.

- Rating coverage: 13.4%.

- Median rating among rated titles: 7.20.

- Titles with at least 1,000 votes: 108,974.

- Leading genre by eligible median rating (at least 30 titles): Animation (median 7.70; n=15563).

Interpretation and actions

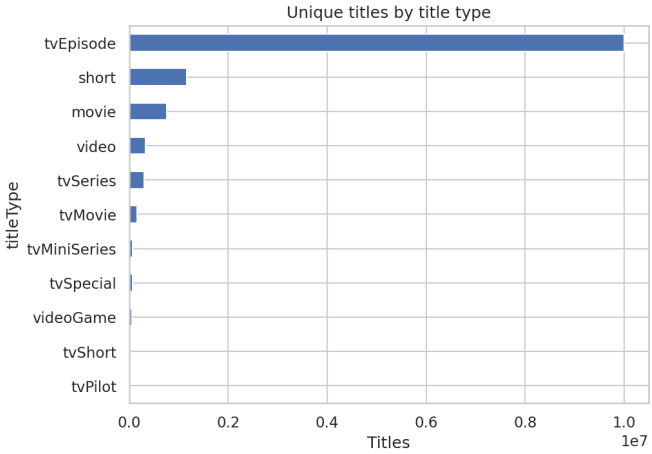

Use genre comparisons to shortlist content for further audience research. Inspect title-type and decade tables before interpreting aggregate differences. Compare high-rated titles alongside vote counts and test whether rankings change with the vote threshold. Do not treat high ratings as evidence of commercial success.

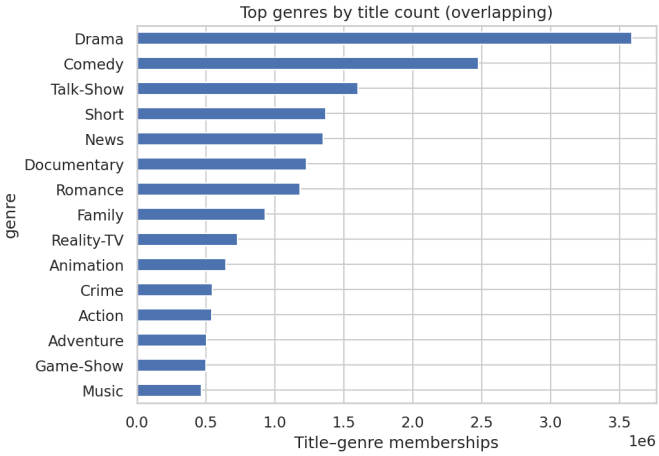

Limitations

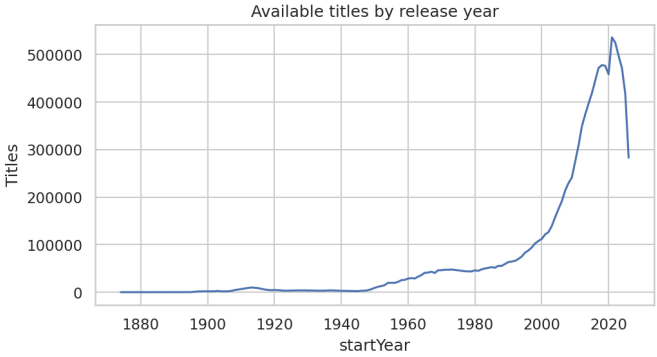

Multiple genres per title, missing ratings, selection bias among voters, unequal vote counts, historical snapshot coverage and mixed title types limit generalization. Correlations are not causal. The latest year may be incomplete. No revenue data are analyzed.

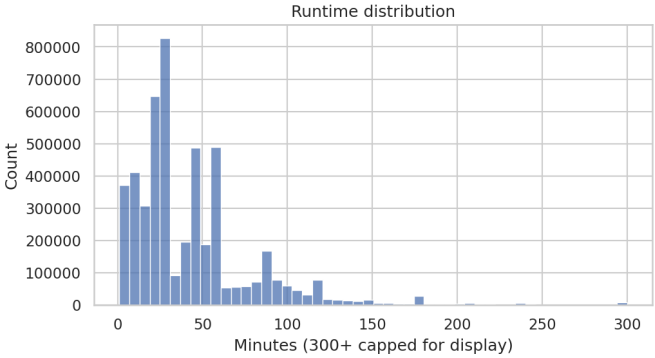

Evidence: figures on the following pages; numerical tables and source links accompany this PDF in the repository. Dataset download date: 2026-11-06.
